Web Announcement 1415

## **Attention All Providers: Nevada Medicaid Provider Web Portal (PWP) Upgrade Has Been Implemented**

The Nevada Medicaid Provider Web Portal (PWP) upgrade from version 4.0 to version 5.0 was implemented on July 24, 2017. The upgrade has increased PWP role-based security features, simplified the Create Authorization process and created the ability for providers to upload and submit Prior Authorization Reconsiderations. Previously, most provider types were able to generate prior authorization requests via the Provider Web Portal. With this upgrade, **Dental/Orthodontia, Adult Day Health Care (ADHC) and Personal Care Services (PCS)** providers are also able to generate a prior authorization request via the Provider Web Portal.

For related training, please see the Provider Web Portal Prior Authorization and Provider Web Portal Personal Care Services training presentations posted on the [Provider Training](#) webpage under Workshop Materials.
